Nature Post ^{Evo} Pedestrian Counter

Overview

The PYRO^{Evo} in an Nature Post is a robust, reliable and trusted people counter. Housed within a durable metal post, designed to withstand the harsh outdoor environment.

The system combines a physical counter with a user friendly software to analyse your site, understand trends (such as hourly, daily and monthly patterns) and share analyses with partners.

The Nature Post ^{Evo} in a Wooden Post is the ideal solution to capture people counting trends on hiking trails, national parks, mountain bike trails, parks and gardens and more.

Turnkey solution

The Nature Post ^{Evo} is easier to use and more versatile than ever. Never before has it been so easy to count all trail users including hikers, cyclists, kayakers and more.

Designed for the outdoor

Compact, robust, battery-powered, anti-vandalism and waterproof, the Nature Post ^{Evo} blends perfectly in the outdoor environment.

The Nature Post ^{Evo} is easy to use and requires little maintenance.

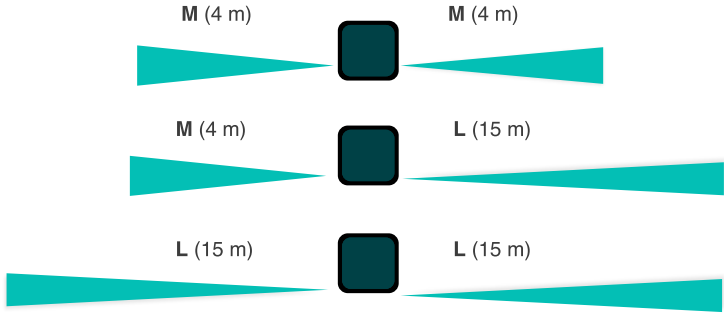

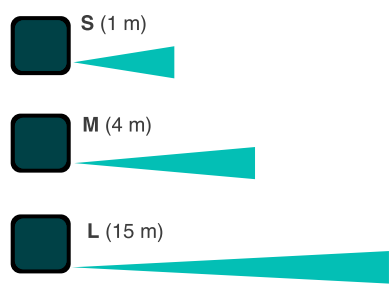

The battery powered counter can be left untouched for up to two years, after which time the batteries are easily replaced.

In the latest version of this counter, remote upgrades and maintenance are possible, meaning one less trip into the field for you.
