

The PYRO-Box^{Evo} is our lightest, most versatile people counter yet. It is 7 times smaller and 5 times lighter than previous versions of the PYRO Box.

PYRO-Box^{Evo} Pedestrian Counter

Overview

The system combines a physical counter with a user friendly software to analyse your site, understand trends (such as peak hours and seasonal patterns) and share analyses with partners.

The PYRO-Box^{Evo} is the ideal solution to capture people counting trends on sidewalks, shared paths, pedestrianised streets, urban trails and more.

Turnkey solution

The PYRO-Box^{Evo} is lighter, smaller and more versatile than ever.

Never before has it been so easy to count all active transportation users including pedestrians, cyclists, skateboarders, rollerbladers and more.

Compact, robust, battery-powered, anti-vandalism and waterproof, the PYRO-Box^{Evo} blends perfectly in the outdoor environment. Its environmental impact has been reduced by 70% compared with our previous PYRO range.

Easy to use and install

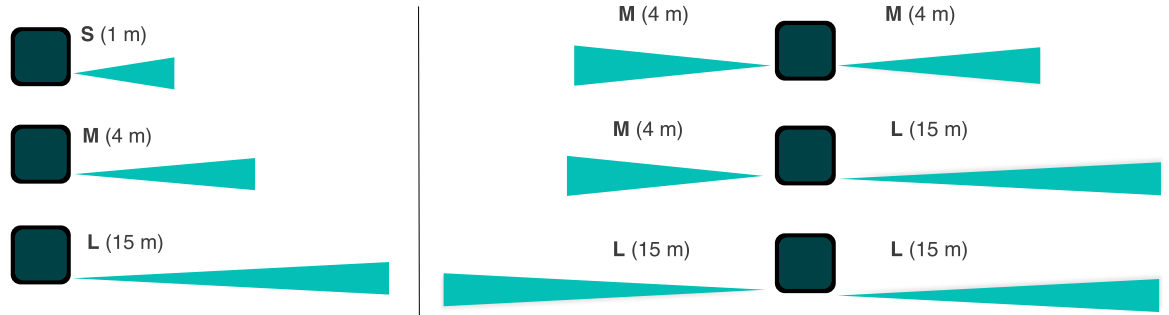

The PYRO-Box^{Evo} is easy to use and requires little maintenance.

The battery powered counter can be left untouched for up to two years, after which time the batteries are easily replaced. In the latest version of this counter, remote upgrades and maintenance are possible, meaning one less trip into the field for you.

Configurations for path widths

Specification

-  **Dimensions** 12.6 x 12.6 x 5.35cm (5" x 5" x 2.10")
-  **Weight** ≈ 820g (1.8 lbs)
-  **Operating temperature** -25°C to +70°C (-13°F to 158°F)
-  **Waterproof** IP68
-  **Material** POM-C
-  **Colour** Grey - RAL 7016 (other colours available on request)
-  **Range** 1m to 10m (33')
-  **Data** 4G -Cat-M1 & NB-iot (Compatible with 5G)
